

Core Java

OOP concepts: Encapsulation, Inheritance, Polymorphism, Abstraction. String is immutable for security, performance, and thread safety. Collections: List, Set, Map differences.

Advanced Java

Multithreading: Thread lifecycle, synchronization, deadlock. ExecutorService, Callable, Future. JVM basics and Garbage Collection.

SQL

Joins: INNER, LEFT, RIGHT. Normalization, indexing, and query optimization.

Spring Boot

Dependency Injection, IoC, REST APIs, annotations like @RestController, @Autowired.

Coding Programs

Reverse string, palindrome, Fibonacci, multithreading examples, collections manipulation.
